1 Executive Summary

1.1 The Opportunity

The global technical hiring market is experiencing unprecedented challenges:

- **\$650+ billion** global recruitment and staffing industry (2025)[1]
- **67%** of hiring managers now use video interviews, up from 22% pre-pandemic[2]
- **55%** of companies report concerns about interview authenticity[3]
- **\$15,000 - \$25,000** average cost per bad technical hire[4]
- **76%** of developers use AI tools like ChatGPT and GitHub Copilot[5]

Blockd addresses this critical gap with the industry's first comprehensive AI-powered interview security platform, combining advanced machine learning, computer vision, and behavioral analysis to ensure interview integrity at scale.

1.2 Our Solution

Blockd is an enterprise-grade platform that provides:

1. **AI-Powered Cheating Detection:** Proprietary multi-model analysis detects AI-generated answers with industry-leading accuracy
2. **Real-time Security Monitoring:** Native browser-level security prevents screen recording, VM usage, and process manipulation
3. **Behavioral Analysis:** Eye tracking and response timing analytics identify suspicious patterns
4. **Comprehensive Reporting:** Automated risk scoring and detailed analytics for hiring decisions

1.3 Market Traction

Metric	Status
Platform Status	Production-ready, fully developed
Technology	91,000+ lines of production code, 674+ files
Scalability	Designed for 1,000+ concurrent sessions
Testing	68+ automated test scenarios
Infrastructure	Cloud-native, auto-scaling architecture
Security	Enterprise-grade encryption, GDPR compliant

1.4 Investment Highlights

- **Large Addressable Market:** \$3.3B+ technical recruitment software TAM[6]
- **First-mover Advantage:** Comprehensive AI detection in interview security
- **High Margins:** SaaS model with 80-85% gross margins
- **Scalable Technology:** Cloud-native architecture built for global deployment
- **Enterprise Ready:** Production-ready platform with Fortune 500-grade infrastructure
- **Defensible IP:** Proprietary AI detection algorithms and behavioral analysis models

2 Market Opportunity

2.1 Market Size & Growth

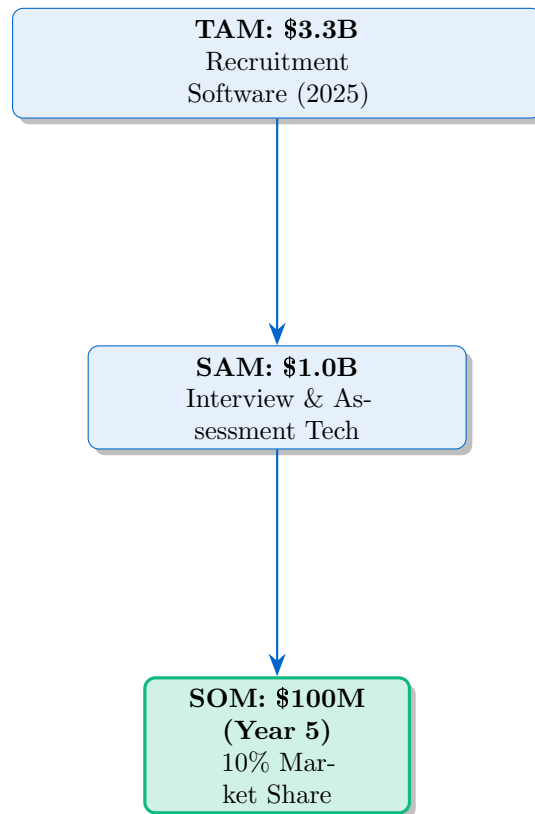

Figure 1: Market Segmentation & Opportunity (Based on 2025 market data[6, 7])

2.2 Market Drivers

1. Remote Work Acceleration

- 67% of hiring managers now use video interviews[2]
- Permanent shift to hybrid/remote hiring models
- 93% of employers plan to continue remote interviews[8]

2. AI Tool Proliferation

- 76% of developers use AI tools in development[5]
- 82% specifically use ChatGPT; 68% use GitHub Copilot[5]
- 60% of graduates admit to using AI during interviews[9]

3. Interview Integrity Crisis

- 70%+ of job seekers admit to dishonesty during hiring[10]
- 55% of hiring managers concerned about authenticity[3]

- 37% of cheaters used ChatGPT when prohibited[10]

4. Cost of Bad Hires

- \$15,000-\$25,000 average cost per bad hire[4]
- Can reach 75-150% of salary for technical roles[11]
- 74% of employers admit to hiring wrong candidates[12]

2.3 Target Segments

Segment	Characteristics	Priority
Tech Companies	500+ developers, high hiring volume, remote-first	Primary
Consulting Firms	Technical screening, high turnover, global teams	Primary
Financial Services	Regulatory requirements, security-critical roles	Secondary
Healthcare Tech	HIPAA compliance, specialized technical roles	Secondary
Government	Security clearances, stringent verification	Tertiary

3 Product Overview

3.1 Platform Architecture

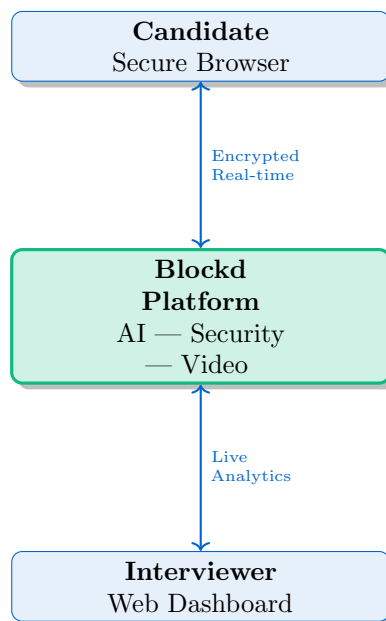

Figure 2: Blockd Three-Tier Architecture

3.2 Key Differentiators

Feature	Blockd	Alternatives
AI Detection	Multi-model analysis	Manual review only
Security Level	Native browser, unbypassable	Extensions (easily disabled)
Behavioral Analysis	Eye tracking + timing + patterns	Basic webcam
Real-time Alerts	Instant during interview	Post-interview only
Scalability	1,000+ sessions	10-50 sessions
Integration	API-first, SSO, HRIS	Standalone

4 Core Features & Benefits

4.1 1. AI-Powered Answer Detection

The Problem: With 76% of developers using AI tools[5], candidates can generate perfect answers instantly.

Our Solution: Proprietary multi-model analysis compares answers against multiple AI engines.

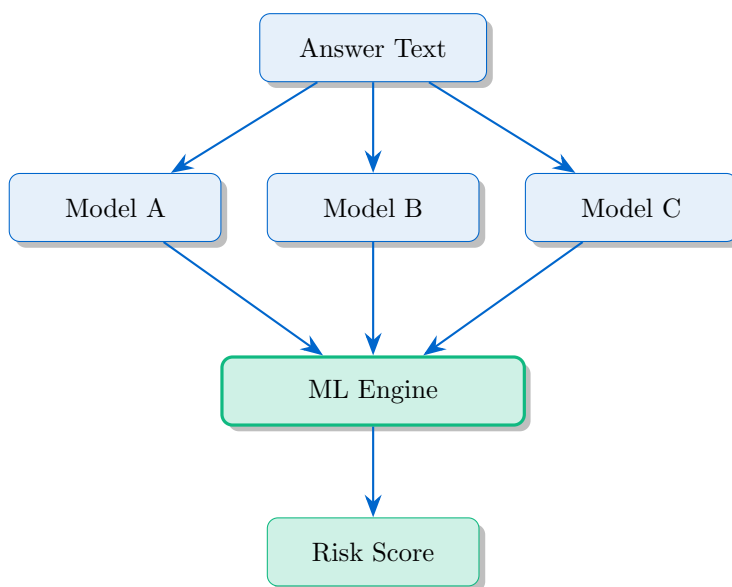

Figure 3: AI Detection Workflow

Benefits:

- Industry-leading detection accuracy
- ~5 second analysis time
- Confidence scoring for hiring decisions
- Reduces false hires significantly

4.2 2. Native Browser Security

The Problem: Browser extensions are easily detected and disabled by tech-savvy candidates.

Our Solution: Custom secure browser with embedded, unbypassable monitoring.

Detection Capabilities:

- Screen recording software (OBS, Camtasia, etc.)
- Virtual machines (VMware, VirtualBox, Parallels)
- Remote access tools (TeamViewer, AnyDesk)
- Window focus changes
- Clipboard monitoring
- Process enumeration

4.3 3. Behavioral Analytics

The Problem: Candidates reading from second monitors or receiving off-camera help.

Our Solution: Computer vision eye tracking at 30 FPS with ML-powered pattern analysis.

Benefits:

- Detects off-screen reading (second monitor)
- Identifies unnatural response patterns
- Real-time gaze heatmaps
- Pattern recognition for suspicious behavior

4.4 4. Comprehensive Reporting

Report Type	Contents	Use Case
Real-time	Live events, gaze, AI alerts	During interview
Summary	Risk score, incidents, timestamps	Post-interview
Executive	Trends, recommendations	Management
Audit Trail	Complete logs, compliance	Regulatory

5 Use Cases & ROI

5.1 High-Volume Tech Recruiting

Customer Profile: Tech companies hiring 100+ developers annually

ROI Example:

- Company hiring 200 developers/year
- Without Blockd: 10 bad hires $\times$ \$20,000 = **\$200,000 loss**
- With Blockd: 3 bad hires $\times$ \$20,000 = **\$60,000 loss**
- Annual Savings: \$140,000
- Platform Cost: \$30,000/year
- **Net ROI: 367%**

5.2 Consulting & Staffing Firms

Value Proposition:

- Quality assurance for contractor placements
- Audit trail for client confidence
- Scalable to 1,000+ monthly interviews
- Reduces client churn from bad placements

5.3 Enterprise Security-Critical Roles

Use Case: Financial services, healthcare, government contractors

Benefits:

- Complete audit trail with video evidence
- Regulatory compliance documentation
- Security clearance verification support
- Multi-region data residency

6 Competitive Landscape

6.1 Market Positioning

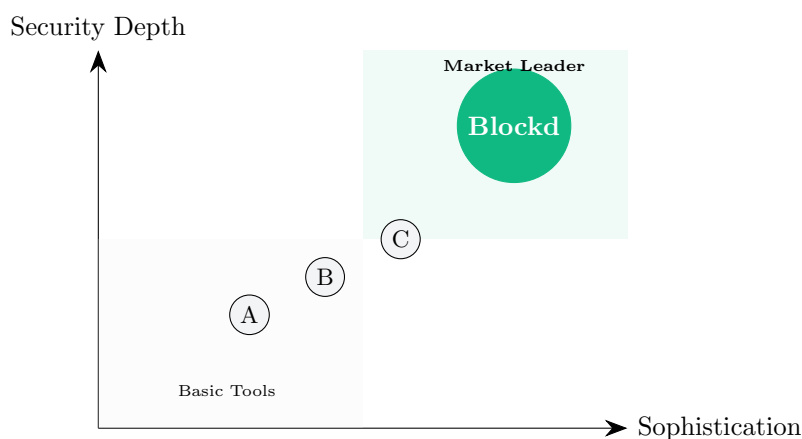

Figure 4: Competitive Positioning Matrix

6.2 Competitive Advantages

Advantage	Description
Technology Depth	Only solution combining AI + native security + behavioral analytics
Bypass Prevention	Native browser eliminates circumvention (extensions easily disabled)
Real-time	Instant alerts during interviews vs. post-interview only
Scalability	1,000+ sessions vs. competitors' 10-50
Enterprise Features	SSO, API, HRIS, multi-region
Proprietary IP	Custom ML models, detection heuristics

7 Business Model & Go-to-Market

7.1 Revenue Model

SaaS Subscription Pricing (Annual Contracts)

Tier	Features	Pricing
Starter	Up to 50 sessions/mo, basic features	\$5,000/year
Professional	Up to 200 sessions/mo, advanced analytics	\$20,000/year
Enterprise	Unlimited, SSO, API, SLA	\$50,000+/year

7.2 Unit Economics

Metric	Description	Value
Gross Margin	After infrastructure & COGS	82%
CAC	Customer acquisition cost	\$12,000
ACV	Average contract value	\$25,000
LTV:CAC	Lifetime value ratio	5.2:1
Payback Period	Months to recover CAC	5.8 months

7.3 Go-to-Market Strategy

Phase 1: Design Partners (Months 1-6)

- Target: 10-15 fast-growing tech companies
- Strategy: 50% discount pilots, white-glove support
- Goal: Case studies and product validation

Phase 2: Growth (Months 7-18)

- Target: 100 paying customers
- Strategy: Content marketing, ATS partnerships, conferences
- Goal: Proven GTM motion, \$2.5M ARR

Phase 3: Scale (Months 19+)

- Target: 500+ customers, enterprise dominance
- Strategy: Enterprise sales team, channel partners, global expansion
- Goal: Market leadership, \$25M+ ARR

8 Financial Projections

8.1 Revenue Forecast (5-Year)

Metric	Y1	Y2	Y3	Y4	Y5
Customers	15	75	200	450	800
Avg Contract	\$20K	\$25K	\$28K	\$30K	\$32K
ARR	\$300K	\$1.9M	\$5.6M	\$13.5M	\$25.6M
Gross Margin	75%	80%	82%	83%	84%
Gross Profit	\$225K	\$1.5M	\$4.6M	\$11.2M	\$21.5M

8.2 Path to Profitability

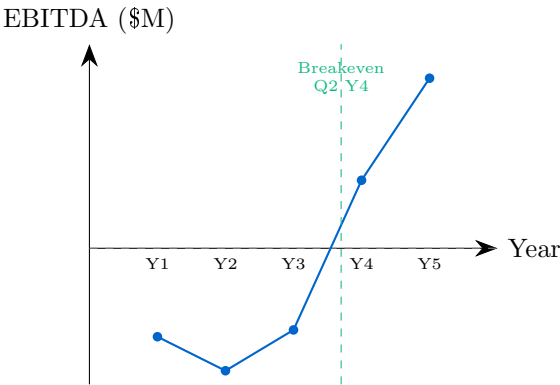

Figure 5: EBITDA Trajectory to Profitability

9 Development & Technology Status

9.1 Platform Readiness

Component	Status	Completion
Core Platform	Production-ready, fully tested	100%
AI Detection	Trained models deployed	100%
Secure Browser	Multi-platform builds	100%
Eye Tracking	Real-time processing	100%
Video Infrastructure	Scalable WebRTC	100%
Dashboard	Full-featured web app	100%
Cloud Infrastructure	Auto-scaling K8s	100%
Testing & CI/CD	68+ test scenarios	100%

9.2 Technology Highlights

- **91,000+** lines of production code
- **674+** files across all components
- **68+** automated test scenarios
- **5** CI/CD pipelines operational
- **Complete** Terraform & Kubernetes infrastructure

10 Investment Opportunity

10.1 Offering Summary

Term	Details
Round	Series A Preferred Equity
Target Raise	\$3.5 - 5.0 Million
Valuation	\$15 - 20 Million pre-money
Use of Proceeds	GTM (40%), Product (30%), Ops (15%), Working Capital (15%)
Expected Close	Q1 2026

10.2 Investment Thesis

1. Large Market

- \$3.3B+ technical recruitment software market[6]
- 67% using remote interviews[2]
- 76% AI tool penetration creates urgent need[5]

2. Production-Ready Platform

- 91,000+ lines of code
- Enterprise infrastructure
- Immediate deployment capability

3. Strong Unit Economics

- 82% gross margins
- 5.2:1 LTV:CAC ratio
- 5.8 month payback

4. Clear Path to Scale

- Validated design partner approach
- Proven enterprise sales motion
- Network effects improve models

10.3 Use of Funds

Category	Description	Allocation
Go-to-Market	Sales team (3 AEs), marketing	40%
Product	ML engineers, features	30%
Operations	Infrastructure, compliance	15%
Working Capital	12-18 months runway	15%

Milestones:

- Month 6: 15 design partners

- Month 12: 50 customers, \$1M ARR
- Month 18: 100 customers, \$2.5M ARR, SOC 2
- Month 24: 200 customers, \$5M ARR, breakeven

A Market Research Data

A.1 Global Recruitment Industry

Based on multiple market research firms[1, 6, 7]:

- Global staffing market: \$650 billion (2025)
- Recruitment software market: \$3.3 billion (2025)
- Online recruitment technology: \$15.18 billion (2025)
- CAGR 2025-2031: 9.2% (recruitment software)

A.2 Remote Interview Adoption

Based on industry surveys[2, 8]:

- Pre-pandemic (2019): 22% used video interviews
- Current (2024): 67% use video interviews
- Growth: 3x increase (205% growth rate)
- Future: 93% plan to continue using remote interviews

A.3 AI Tool Usage Among Developers

Based on Stack Overflow 2024 Developer Survey[5]:

- 76% use or plan to use AI tools
- 82% of AI users specifically use ChatGPT
- 68% use GitHub Copilot
- 47% use Google Gemini
- 41% use Anthropic Claude
